Corneal Refractive Correction With Mel80 Excimer Laser and/or VisuMax Femtosecond Laser

Figure 16-3. Initial edge separation.

Figure 16-4. Initiate flap separation from the hinge area.

Figure 16-5. Flap elevation: Initial central dissection.

Figure 16-6. Stromal bed: Observe the high quality of the FS cut and edge.

Figure 16-7. Flap repositioning: Observe the perfect edge alignment.

Figure 16-8. General view of the VisuMax system.
