Most of the material in this chapter is taken from *The Crystal Clear Guide to Sight for Life* (Starburst Publishers, Lancaster, PA), and has been reprinted with permission of the publisher.

This chapter is divided into two sections. Section One discusses symptoms of a visual nature. Section Two lists physical symptoms. Symptoms are listed alphabetically. If you don’t find a particular item, try wording it a different way. (For example, “flashin lights” is listed as “light flashes.”) It is important to note that any symptom may have any number of potential diagnoses; some are more likely than others. It is up to the eye care practitioner to determine each patient’s diagnosis and care.
