Submission Requirements for Feature Articles, Reviews, and Case Reports

Fee Requirement

In order for Orthopedics to maintain its model of making all content freely accessible online (www.healio.com/ortho), we have implemented a submission fee for some manuscript types to help offset some of the peer review and production costs.

As of May 2014, a non-refundable $190 processing fee for peer review is due at the time of submission for unsolicited Feature Articles, Reviews, and Case Reports. Authors are asked for payment via PayPal at the end of the submission process in Editorial Manager (www.editorialmanager.com/orthopedics).

Waivers

Waivers are available for authors who are current Orthopedics Editorial Board members listed here, or corresponding authors from the countries (Groups A and B) listed on the World Health Organization HINARI website here. If you choose either of these waivers but are not eligible, your manuscript will be returned to you for payment.

If you qualify for a waiver, please check the “Request Waiver” box and copy and paste the selected reason in the Comments to Publication box.

Please direct any questions to prs_staff@slackinc.com.
